RED TEAM WORKSHOP PREPARATION GUIDE

"BERSERK BEAR"

A. Install Office 2013 in Windows

Step 1: Prepare for Installation

1. **Check System Requirements**: Ensure that your system meets the minimum requirements for Office 2013. Generally, Windows 7, Windows 8, Windows 8.1, and Windows 10 are compatible with Office 2013.

2. **Sign in to Your Microsoft Account**: If you purchased Office online, sign in to your Microsoft account where you can find your Office 2013 product key.

Step 2: Download or Insert Installation Media

1. **If Downloading from the Web**:

    o   Go to https://www.microsoft.com/software-download/office and sign in with your Microsoft account.

    o   Locate Office 2013 in your account and click **Download**.

2. **If Using a DVD or USB Installation Media**:

    o   Insert the Office 2013 DVD or connect the USB to your computer.

    o   Open the DVD/USB drive from **File Explorer**.

Step 3: Start the Installation

1. Locate the **Setup.exe** file in the Office folder. Double-click on it to begin the installation.

2. **Enter Your Product Key**: When prompted, enter your 25-character product key. This key is usually found in your email if purchased online or inside the DVD case.

3. **Agree to the License Agreement**: Review and accept the terms by checking the **I accept the terms of this agreement** box.

Step 4: Choose Installation Options

1. **Choose Install Location (Optional)**: If you want to install Office 2013 in a location other than the default folder, click **Customize** and select the desired location. Otherwise, click **Install Now**.

2. **Select Programs to Install**: In the Customize options, you can choose which Office applications to install (e.g., Word, Excel, PowerPoint). This can save disk space if you don't need the full suite.

Step 5: Complete the Installation

1. Once the installation begins, it will take several minutes to complete. Do not turn off your computer or interrupt the process.

2. When the installation completes, you'll see a message that says **Office is installed** or similar. Click **Close**.

Step 6: Activate Office 2013

1. Open any Office application, like Word or Excel.

2. You'll be prompted to activate Office. Choose **Activate over the Internet** (recommended) or **Activate by phone** if necessary.

3. Follow the on-screen instructions to complete activation.

Step 7: Update Office 2013

1. Go to **File** > **Account** > **Update Options**.

2. Click **Update Now** to install any available updates, ensuring you have the latest security patches and performance improvements.

Step 8: Set Office Preferences (Optional)

1. Open any Office application and go to **File** > **Options** to customize settings like the theme, default font, and auto-save options.

After following these steps, Office 2013 should be fully installed, activated, and ready to use!

**B. Installing Phishery in Kali Linux**

1. First, update your package list by running **sudo apt-get update** to ensure everything is up-to-date.

2. Then, install Phishery with **sudo apt-get install phishery**. This command will automatically handle any necessary dependencies.

3. Finally, verify that phishery was installed correctly by running **phishery -v**, which should display the installed version.
